

950 SER. CORELUBE SYSTEM

WIRE ROPE & EM CABLE LUBRICATION / CLEANING SYSTEM

**DESIGNED FOR APPLYING WIRE ROPE
OILS ONLY.**

**Accommodates Cable Sizes From:
0.626" (15.9mm) --- 3.500" (89.0mm)**

950 SER. HOUSING

The Complete 950 Ser. CoreLube System
shown with 1 Liner & 1 Bushings.

BENEFITS

- Penetrates lubricant into the strands & core of the wire rope.
- Eliminates lubricant dripping and fling-off, by air wiping the cable.
- Removes trapped moisture and detrimental particles.
- Continuously circulates & filters oil under pressure.
- Quick to rig up.
- Easy to Operate.

There is no other cable oiling system that can circulate oil under pressure other than the CoreLube (850 & 950 Ser.) System.

Oil penetration between the wires that make up the strands is imperative in reducing friction & corrosion.

Circulating a high volume of oil around the wire rope not only promotes penetration but also cleans by carrying off the contaminants.

The kinetic air energy behind the patented air seals, sets the 850 & 950 Ser. apart from all other cable oiling devices.

950 SER. CORELUBE SYSTEM

CoreLube's patented AIR-SEALS ensures that the lubricant remains within the housing, preventing wastage and environmental contamination.

COMMENTS FROM CUSTOMERS

- Wire rope grease fling-off has virtually been eliminated.
- CoreLube performed as advertised.
- The other grease lubricating systems were messy and trapped moisture internally.
- The CoreLube System penetrated the wire rope rapidly with lubricant and removed most of the moisture internally and externally without a mess.
- The maintenance crews found the CoreLube System clean, neater and faster over all other systems.

PROBLEM SOLVING SOLUTION OF THE YEAR

SIFTO SALT MINE

The miners shown in the photo won \$16,000.00 when they submitted the CoreLube System in a contest put on by SIFTO, for the best overall problem solving solution of the year. They had used two other grease lubricators prior to the Core-Lube System.
